**Course Name:** Mastering Business Analysis  
**Course Duration:** 40 hours  
**Class days and timings:** Monday, Wednesday & Friday: 6:45 P.M. to 8:45 P.M.

**Course Overview:**  
This course is a 40 hour certificate program on Mastering Business Analysis which aims at providing a comprehensive idea of various activities pertaining to Business Analysis. Business analysts are the people who help the organizations by recommending solutions to implement new systems or processes.

Business analysts are in great demand all over the world in various sectors such as Automobile, Health Care, Hospitality, Education, Engineering, Construction, Information Technology & Software Development etc. Though Business Analysis is a dominant position in organizations it doesn’t have an academic curriculum in institutions. To bridge that gap and to impart relevant knowledge, this course work has been developed.

The course on Mastering Business Analysis (BA) shall encompass various dimensions of Business Analysis with key focus on practical application to apply them in day-to-day BA activities. Post this training, both the individual and the organisation are able to accomplish the following:
- To identify right solutions
- To provide a clear road map for project execution
- To improve processes
- To save huge costs in projects
- To satisfy customers

The course unravels the business analysis concepts and techniques with practical examples that can be readily applied in your day-to-day work. The course is taught by CBAP certified business consultants who have several years of experience handling large business analysis projects for domestic and international clients and in teaching business analysis for various corporates and institutions. These experts will help you to excel in your career as a business analyst.

**Target Audience:**
