

DELIGHTFUL LEARNING EXPERIENCE AT AN INDUSTRIAL VISIT TO TRIVANDRUM

Students have a learning experience at one of the animation studios

Students of III B. Voc 3D animation had an engaging industrial visit to Trivandrum, Kerala 26th to 28th September 2019. Zebu Animation Studio at Techno Park was the first stop for the students DDU KAUSHAL Kendra, Loyola College.

A start-up company, Zebu Animation Studio, was a great learning experience. With branches in other parts of Kerala and also a unit in Delhi and Calcutta provided us insights on VFX and pure animation through their current animation series on Ghost Busters with Lego models. They showed us the first Episode which they had completed and got approved by the client, which was to be released in a couple of days when we visited.

Lumicel animation, our second stop, provided first hand experience about 2D animation. With branches all over the world, they work on cartoon series and other 2d animation work. Apart from the learnings, a serene ambience and

clear view of the beach spotted with coconut from the 7th and 8th floors of the building was mesmerising. We visited many animation studios like Adaar, which is a 3D Ad agency who work with branded products like Vivo, Samsung, nickelodeon and other cartoon series.

Time to relax at one of the beautiful beaches of Kerala.

What is learning without witnessing the beauty of God's Own Country? We visited poovar, an island in the outer region of Trivandrum, which sees confluence the Neyyar river and the Arabian sea. Mother Mary was blessing us near the island standing Godfully on a pedestal.

We also visited Kallar waterfalls it was one of the famous shooting spot of the 80s. The water was so sweet and pristine. We walked for about 1 hr to reach the falls. But the sort of trekking enhanced the beauty of the place. On the whole it was learning as well as enjoyable trip.
