

3D Modelling and Printing Workshop by Pencil & Monk: Hands-on Training for Students of Loyola KAUSHAL Kendra

By Beulah Evangelin N, 20-UAN-010

The design studio Pencil & Monk conducted a hands-on workshop on 3D Modelling and Printing for 3D Animation students of DDU KAUSHAL Kendra, Loyola College. The workshop was conducted on 23rd November, 2021 by five experts from Pencil & Monk.

The workshop was engaging because the students were made to do various activities. They were given a worksheet with the movie mapping canvas. The worksheet had meanings of the terms in Tamil too. The students then did a short activity of writing their favourite movie names.

To make the students understand movie mapping, two videos were played. The first clip briefly explained about the movie mapping canvas. After watching the video, students were made to do an exercise where they applied the movie given by the team in the cycle. After the second video on “Hero’s Journey”, students were given another exercise where they applied their favourite movie in the cycle.

Students were split into groups and taught how to use the software blender. Students also did an exercise based on different studios and companies of their interests. The 3 hour workshop was intensive, interesting, interactive and useful.
